### Preamble

The basis of this TTP is ‘Pedagogy’, defined specifically for the Architectural Design Studio. In architectural education, the purpose of a design studio is to ‘mentor’ the student towards holistic understanding of Architectural design. It is not uncommon for the design teachers to have different view points. Differences among the teachers of design coupled with the paradox of having to ‘teach’ design leads to a lack of Pedagogy for the course. This lack of clarity over the purpose and effectiveness of the design studio is reflective of its complexity as a teaching/ learning setting. (Models of Design in Studio Teaching, Stefani Ledewitz,1985).

The **primary objective** of this TTP is two tiered:

- To provide an overview of various traditional and cognitive approaches to design.
- To expose the educators to effective didactical devices to improve the learning experience in the architectural design studio.

The **secondary objectives** include:

- To develop the correlation between architectural history & theory with the design process.
- To introduce and encourage personal research and exploration.

### The program is structured as follows

1. Architectural Design methods and Processes
2. Traditional and Modern Pedagogic tools
3. Correlating Architectural History, Theory with design
4. The Built Environment
5. Integrating concept of Sustainability in Design
6. Enriching Pedagogy with personal Reading and Research
