Preamble

Architecture has been practiced in India for centuries, education was traditionally the responsibility of a few masters and passed along to other generations. The process of learning architecture started with a practice of apprenticeship. Post industrial revolution the Schools of Architecture evolved with various schools of thought from Art nouveau, Chicago school, Bauhaus to Deconstructivism and Parametric Architecture. Last decade has seen the raise of a few institutions which broke away from the conventional fixed course structure, and adapted a more open curriculum with many elective courses.

Interdisciplinary courses of design like Product Design, Fashion Design, Interior Design, Communication Design, Artificial Intelligence influence architecture and the way of looking at designing. Impact of the evolution of these field does affect the development and evolution of Architecture and the Designing Techniques. Hence the knowledge of the designing along with these interdisciplinary fields becomes important for architects.

Course Overview

We during this Program would like to include and exchange, interdisciplinary Design knowledge as it helps us analyze the differences and develop teaching skills accordingly. We have seen rise and fall of many different schools of thoughts in architecture post-Independence in all fields of Design. We have been through several periods of change in pedagogy. We have come a long way towards modern Architecture. We need to provide an open and legitimate architectural education in India. This Faculty Development Program is one small step in improving the existing pedagogy in India. Let us share the new ideas and rekindle our school of thought in a way that benefits both masters and beginners alike.

REGISTRATION PROCESS

Teachers/Architects who wish to register for the training program either under Collaborative Training Program(CTP) or as independent individua may do so by filling up the attached Google form.
