About the FDP

The program aims to bring together renowned experts and speakers from specialized domains of teaching Design and Architecture from across the globe through discussion, knowledge sharing, and continued education and training of faculty.

Advancements in technology for decades have led to the globalization of the world. In the field of education, faculties, as well as students, are considered to be the two fundamental blocks of an educational system. Students and Teachers both need to refresh their knowledge with the passing of time as the world is moving towards technological advancement which leads to the discovery as well as the invention of new aspects in the architectural field of education as well as practice. Hence in order to provide the best teaching to the student, teachers must also know the best of all. The architectural education system needs integration & implementation of innovation, practical knowledge, and present-day concerns in teaching methodologies.

TAKE -AWAYS

1. Knowledge of new techniques for teaching and learning & implementation of the same.
2. Insight on amalgamation of current vs future (needs) in architectural teaching pedagogy.
3. Academicians will get inspired and learn from examples of case studies on various topics discussed in talks by experts.
