Council of Architecture - Training and Research Center, Bhopal

Organizing

Two Days National Online Workshop

The Architectural Thesis:
Requirements and Expectations

LIMITED SPOTS AVAILABLE !

Preamble:

The approach towards the architectural thesis has changed over the past few years. Every stage of the thesis have consequences. The right approach to each stage becomes crucial in making the thesis a successful one. The objective of the workshop is to guide the aspiring students of B.Arch and faculty members through the Architectural Thesis process.

Session 1: The difference between the design problem and thesis project
This session will discuss what the main difference between a semester design problem and a thesis project is. How the thesis project will help a student to work independently after graduating.

Session 2: Selecting topic and case studies
The session will cover the essential points while selecting a thesis topic. This session will also stress the importance of choosing a relevant case study for the thesis.

Session 3: Selecting electives, and list of submissions
Generally, an institute asks for two electives, and this session will talk about the importance of the chosen elective, and also, they will give an insight into selecting electives relevant to the topic. Further, the volume of other vital submissions like the physical and digital model, and different drawings will be discussed.

Session 4: Writing a Thesis Report
A thesis report is very crucial, and it is the sole document that stays with a student after graduating. This session will stress the importance of thesis writing and will discuss the basics of writing a thesis report.
