Livable Indian Cities

National Online Short Term Training Program (STTP)

Date: 2nd to 6th January 2023

Time: 1:00 PM – 4:00 PM

Registration on first come first serve basis

About the STTP:

What makes a city liveable? Transport, housing, health. Open space, mobility and the environment. Matters of culture, entrepreneurship, crime and safety. Affordability and access to education. Depending on whose 'liveability index' you look at, it may include design quality, sustainability and the digital infrastructures of the smart city. Other criteria applied may encompass food access, job opportunities or walkability. Inclusivity and the politics of participation also come into play. Discrimination in all its forms impacts liveability and social and political equity.

The past two decades have seen an exponential rise of liveability measures. Reflecting increased urbanity globally, they risk making the notion of the city ever more contested. When we consider the liveability of cities then, it is clear we are dealing with a plethora of issues – both isolated and, inevitably, interconnected.

Take-aways:

1. Impart Knowledge about Architecture, Interior and Spatial Design, Urban planning, Mobility, etc.
2. Allow participants to address issues within the field to encourage Participatory planning, Affordable housing, Sustainable approaches, etc.

Participants:

Academicians, Ph.D Scholars, Policy makers from the Department of Town Planning, Development Authorities, Professionals from fields of Urban Design, Planning & allied fields.
